

Directions for My Snowman

By: Paiton 5B

P.S. Read the whole step, before starting the step

1. First make a circle that's about 3 in. in vertically and 2 in. horizontally, put it on the bottom, then make another circle that's 1 in. in vertically and 1 in horizontally, put it on top of the bottom one, next make a circle that's half an in. in vertically, and $\frac{3}{4}$ in. horizontally, place it on the very top. All of their outline sizes are 3 and are black and the inside color is WHITE. The total height is 4 in a half in. Make sure the three circles are $3\frac{1}{2}$ in. away from the left side, and $3\frac{1}{2}$ in. away from the right side.
2. Next make 8 tiny dots whose outline size is 3 and black and the inside is black, and put it in a shape of a mouth. From the left side of its mouth to the right side is about half of a in.
3. Make an orange triangle shape nose and its outline color is orange and its inside color is orange, and its outline size is 4 and put it in the center of his head. The nose's size should be $\frac{1}{2}$ centimeter long, and $\frac{1}{2}$ a centimeter vertically.
4. Next make 2 little black dots and put one on the top left hand side of the nose, and put one on the top right side of the nose.
5. Then make a black rectangle who's color is black and its inside color is BLACK. It's size is three-fourths of an in. wide and a fourth of an inch in height, and then makes another one that's three-fourth of an in. in height and half an in. in length, and put the first one on the top and the second one on the bottom. And make two yellow lines that is one centimeter in length and it outline size is 3. Then put the one line on the bottom and the other line a centimeter above the second one. Then put a yellow square in the middle of the both of them.
6. Next make 2 brown lines that's outline size is 5 and make it three-fourth of an in. After that make 10 little lines that's outline size is 5 and their a fourth of an in. Then put two on the edge of both arms, then put three on the middle of both arms, and it should look like a hand at the end.
7. The last step is to make a scarf, and to make one, you make one rectangle whose outline size is 4 in., and its 1 in. vertically and a fourth of an in. in horizontally, and it's outline color is #3399cc and its inside color is #cc0099 and put it right under the bottom of the top circle. Then with the color #3399cc make 5 stripes that are a fourth of an in. and put them vertically between the two lines on the scarf. After that make another rectangle that's outline size is 4 and its outline color is #3399cc and its inside color is #cc0099 and it's half an in. in horizontally and is a fourth of an in. vertically, and put it on the bottom right side of the first rectangle. Then make four stripes (the four lines are a fourth of an in. in width.) that are the color #3399cc and put them horizontally on the second rectangle. Finally you're done with the snowman.
